

## Falian Creator Workstation - Launch Summary

Launch Date: June 17, 2025

### Background:

On June 17, 2025, the user officially launched the "Falian Creator Workstation" project, aiming to build a modular, role-switchable, media-integrated intelligent creative platform with version control and real-time AI chat interaction.

### System Modules:

1. Creation Zone
2. Review Zone
3. Layout Zone
4. Proofreading Zone
5. Cover Zone
6. Integration Zone
7. Final Product Zone
8. Rules Zone
9. Network Zone
10. Chat Zone
11. Media/Photo/Video Zone
12. Management Zone
13. Memory Zone
14. History Zone

### Features:

- Each zone supports version tracking and rollback.
- Central chat zone for command input and communication logging.
- AI integration with multiple creative roles.
- Shared media resource library.
- Applicable for writers, editors, designers, researchers, and more.

### Role System:

- Users can select up to three roles.
- Each role has its own interface and tools.
- Role switching UI located in the lower-left corner of the chat zone.

### Security Measures:

- Global anti-copy protection module.
- Expandable modular structure for future role-specific desktops.

### Deployment Info:

- GitHub repository: `falian-creator-ui`
- Domain: [lotusvowlight.com](https://lotusvowlight.com)
- Planned deployment on Vercel.

This document summarizes the initial design and launch setup of the Falian Creator Workstation.

Further implementation logs and updates will be maintained in the version control system.
